
Mesaye Addisu

Atlanta, GA

Professional Summary

Goal-oriented cybersecurity professional with a strong background in leadership, logistics, and technical training. Skilled in risk management, project coordination, and team development, with over 10 years of experience in complex operational environments. Proficient in cybersecurity principles, technical maintenance, and training programs, seeking to leverage expertise in a cybersecurity or management role.

Skills

- Cybersecurity Principles & Risk Management
 - Team Leadership & Employee Development
 - Logistics & Asset Management
 - Project & Operations Management
 - Technical Training & Program Development
 - Troubleshooting & Maintenance Optimization
 - Data-Driven Decision Making
 - Safety Program Implementation
-

Professional Experience

Student, The University of Arizona

Cyber Operations (Cyber Engineering Concentration) | Jan 2024 – Present

- Actively pursuing a Bachelor of Science in Cyber Operations with a concentration in Cyber Engineering.
- Gaining hands-on experience in cybersecurity principles, network defense, and risk management.
- Engaging in projects focused on cloud security, ethical hacking, and secure software development.
- Applying coursework in data analysis, systems administration, and cyber defense strategies to practical scenarios.

Freelance Front End Web Developer

Jul 2020 – Jan 2022

- Developed over 20 responsive web applications using HTML5, CSS3, and React.js, enhancing user experience across various devices.
- Deployed 15+ websites to cloud-native environments like Heroku, achieving zero downtime.
- Improved web application processing speed by 20% using Flask and .NET frameworks.
- Integrated NoSQL databases such as MongoDB and Cassandra to optimize data retrieval processes.
- Evaluated new technologies and frameworks, such as Django and React.js, boosting development efficiency by 30%.

Co-owner & Manager, Shippy Logistics

Jul 2018 – May 2020

- Co-owned and managed a trucking fleet specializing in expedited freight services, ensuring timely and reliable deliveries.
- Developed comprehensive business plans, streamlining financial management and increasing operational efficiency by 15%.
- Built and maintained strong relationships with B2B clients, negotiating contracts that increased long-term partnerships and drove a 15% growth in annual revenue.
- Directed logistics operations, verifying 200+ shipments monthly, achieving 99% accuracy in records.
- Managed the accountability and readiness of company assets valued at over \$750,000, maintaining zero losses.
- Implemented safety protocols and led accident investigations, resulting in a 30% faster resolution time for insurance claims.

U.S. Army – Various Locations

Feb 2006 – Sep 2016

Operations Manager, Technical Trainer, Logistics Coordinator, Maintenance Supervisor

- **Leadership & Team Management**
 - Led teams of up to 30 personnel, coordinating staffing, training, and operational activities to achieve critical objectives in high-pressure environments.
 - Mentored and developed team members, resulting in higher retention rates and improved team efficiency.
 - Fostered a culture of accountability and high performance, ensuring mission readiness and consistent achievement of goals.
- **Operations & Project Management**
 - Managed logistics for assets valued at over \$2 million, optimizing resource allocation and ensuring 100% equipment availability.
 - Coordinated 25+ complex projects, including maintenance, recovery, and international deployments, consistently meeting deadlines.

- Assisted senior leadership with risk assessments and strategic planning, enhancing decision-making for large-scale operations.
 - Developed and implemented safety programs, achieving zero incidents in hazardous work environments.
 - **Training & Employee Development**
 - Designed and executed training programs for over 150 personnel, covering technical skills, safety, and leadership.
 - Conducted hands-on training for equipment maintenance and troubleshooting, leading to a 25% reduction in equipment downtime.
 - Certified employees in advanced driving techniques, preventive maintenance, and safety procedures, boosting workforce readiness.
 - **Logistics & Asset Management**
 - Directed logistics operations, including inventory control and supply chain management, ensuring efficient use of resources.
 - Maintained 100% accountability for assets, reducing losses and optimizing utilization.
 - Streamlined maintenance processes, improving operational efficiency by 20%.
 - **Cybersecurity & Risk Management**
 - Conducted risk assessments and established protocols to protect sensitive information and assets.
 - Supported international operations with a focus on minimizing risks and enhancing security measures.
 - **Technical Skills & Maintenance Expertise**
 - Experienced in troubleshooting complex mechanical systems and improving process quality.
 - Performed quality inspections, ensuring high reliability and compliance with standards.
 - Utilized data-driven approaches to predict equipment needs and optimize resource planning.
-

Education

The University of Arizona – Current

Bachelor of Science in Cyber Operations (Cyber Engineering Concentration)

Thinkful – Graduated Jan 2023

Cybersecurity Analyst Training Program

San Diego Global Knowledge University – Jul 2020 – Feb 2021

Software Development Training Program

Certifications & Awards

- **Demonstrated Logistician**, SOLE - The International Society of Logistics & U.S. Army Logistics University (July 2011)
- **Battle Staff NCO Course Graduate**, U.S. Army Sergeants Major Academy (November 2011)
- **Honorable Order of Samuel Sharpe**
 - Awarded for significant contributions to the Ordnance Corps, recognizing outstanding performance, dedication, and leadership in military logistics.
- **Cybersecurity Analyst Training Program**, Thinkful (Graduated Jan 2023)
- Various military honors for excellence in leadership, logistics, and operations
